1. What work has the team done toward the project this week?

This week we successfully change our setting about PDF downloading of our chromedriver. And we can start scraping the secretary website.

2. Is the team having any issues?

Again after we change our scraping tools we still meet the problem that the website would deny our requests after about one hundred downloading requests and nothing changes even if we try our best to modify the frequency of our requests.

3. What work does the team plan to do next week?

- a. Try to deal with the denial of the website with our manager, like proxy Ip.
- b. Extracting names, locations and other information we want from the PDFs we have.
