

1. What work has the team done toward the project this week?
2. What work does the team plan to do next week?
3. Is the team having any issues?

1. We've resolved the comma issue by implementing Pandas library. We've also made progress in filtering the dataset to rows that contain specific LUC (location codes) and also filtered via State Owned Land.
2. We plan on completing the merge between our dataset and the Mass Government Agency List.
3. The issue we encountered stems from Zillow's API so we are considering alternative APIs, such as GIS API.
