

## Scrum 04-10

- What have I worked on?

We found more data about RI. For NH, there is no more cases, because there is only one court—superior court.

We briefly analyze the NH data. We search the keywords “informant” and ‘C.I.’ in criminal cases and plot the proportion. We found there is no obvious relation between the informant and overturned.

- What will I be working on next?

Next we need more time to extract RI data. Because the new data has different format from the original. We need to rewrite the code.

Also, we will pick up all cases contained informant and analyze this data.

- Have I run into any issues? Do I need help?

New data extraction may need more time.

- Have I talked to the client recently? When are we meeting with them next?

We talked to the client on 04/10/2020

We will have a meeting on 04/17/2020
