

SCRUM 02-28-20 - Cambridge Evictions Study

Team Members: Tiancheng Zhu, Kevin Peters, Drew Abram, Syahrial Dahler

1. What work has the team done toward the project this week?

Through Deliverable 1, the team has collected the necessary data through web scraping and has performed preliminary statistical analysis on a portion of the data. Our team is currently working on cleaning and parsing the remaining data so that further machine learning techniques can be applied.

2. What work does the team plan to do next week?

The team plans to continue identifying trends (and lack of trends) between different data attributes and classifications. The team will also work to binarize or numerically categorize data by threshold values so that further statistical analysis can be performed. The team will continue to identify relevant data and preprocess data into a format convenient for analysis.

3. Is the team having any issues?

The team is not having issues at this time. We have been in contact with the project client.
